

HOSTED VOIP WITH IPRO MEDIA, INC.

See why clients are taking the leap...

There is nothing new about voice over internet protocol, otherwise known as VoIP. A large shift

is underway in the telecommunications industry; many companies are transitioning from traditional telephone systems or analog communications to Internet packet-based networks or VoIP. Some firms bought into VoIP technology as early as the turn of the century.

Today there is no doubt there are many choices when it comes to VoIP providers, but not all of

them are the same. iPro Media has been designing, deploying and maintaining MITEL phone systems for 33 years. In fact, iPro Media is the largest MITEL reseller in Texas and most successful growth partner for the past 2 years in a row. Here are some of the reasons that clients are taking the leap to a fully managed, fully hosted VoIP solution from iPro Media:

1. THE IPRO MEDIA MANAGED VOIP SOLUTION PRESERVES CAPITAL.

This is a game changer for most companies. With a fully managed solution companies pay per user per month without the upfront costs associated with purchasing a PBX system. That said, iPro Media is able to eliminate all local, long distance, inbound 800 charges, SIP trunks, PRI's, and a significant portion of the tax liability (you pay 8.25% sales tax only). Since iPro Media is also a competitive local exchange carrier (CLEC), we are able to renegotiate contracts with ATT, Verizon, Sprint, and all of their competitors. When it makes sense, we can transition to become the customer of record, getting clients out of lengthy contracts, sometimes saving them enough money every month to pay for a new MITEL phone system.

iPro Media manages everything for your firm including configuration, training, all software updates, hardware changes (handsets), and any on-going changes.

2. THE HOSTED VOIP PHONE SYSTEM IS ALWAYS UP TO DATE.

iPro Media manages everything for your firm including configuration, training, all software updates, hardware changes (handsets), and any on-going changes. We manage it all; from the call center down to password resets and extension changes, to any carrier and/or bandwidth challenges. You always have access to the latest in MITEL communications.

3. THE IPRO MEDIA SYSTEM NEVER GOES DOWN.

Have you ever experienced a power outage in your building? The iPro Media phone system keeps running because we are fully virtualized (VMware) in two geographically dispersed data centers. Your office is much more likely to experience an outage than iPro Media so to protect you, we will 'twin' your cell phone to your desk phone so any calls destined there will automatically ring through to your cell phone until the outage is restored. You will always be available to your customers.

4. SINCE IPRO MEDIA IS A PLATINUM MITEL PARTNER/RESELLER, YOU RECEIVE MORE THAN 200 CALL FEATURES UP FRONT.

Mitel, now positioned as a leader in the Gartner

Magic Quadrant offers Business Phone Systems, Cloud Communications, Contact Center, Mobility, Unified Communications, Unified Messaging, Virtualization (the first to be fully virtualized), and is sold into Education, Financial Services, Government, Healthcare, Hospitality, Manufacturing, Media & Entertainment, Professional Services and Retail verticals. iPro Media has been an exclusive Mitel partner longer than most companies have been in business. You need to accommodate SIP trunks? No problem. You want to add call recording? No problem. Your company is in a growth mode so you need to scale? No problem. We know that every company is unique, so iPro Media will customize a solution to fit your circumstances.

iPRO Media will perform a FREE telecommunications audit in an effort to reduce your spend by as much as 25-50%. Interested in a product demonstration?
